Consulting Doctor	Dr. DIPAK PATEL / Dr. RAVI CHAUHAN	Referring Doctor	Dr. DIPAK PATEL / Dr. RAVI CHAUHAN
Received On	25/07/2024 17:44	Reported On	25/07/2024 18:42
		Ordered Location	EXECUTIVE BEDS (TWIN SHARING)- 8F - D

Test Name	Result	Unit	Biological Reference Interval
Pre Op Profile Major			
Blood Group (ABO & Rh) ((Haemagglutination (Gamma Automation) - Forward and reverse grouping))			
ABO Type	A		-
RH TYPE	POSITIVE		-

Note :

BLOOD GROUP- A) Weak D (Du) test is mandatory for confirmation of Rh Negative blood group in blood donors only. In case of Positive Weak D (Du) test of a blood donor, it is considered Rh Positive as a blood donor, but as a patient it is to be considered as Rh Negative.

B) neonates /Infant -Any further testing related to transfusion will be performed against maternal specimens for the first 4 months.

Note : Abnormal Results are Highlighted.

Dr. Bhargav S. Prajapati

		Ordered Location	Laboratory

Test Name	Result	Unit	Biological Reference Interval
Antibody Screening (Detection of unexpected IgG antibodies to Red Cells)*			
ANTIBODY SCREEN	NEGATIVE		-

Note :
Test description:

Unexpected antibodies are found in the sera 0.3 to 3% of donor and patient populations. Many antibodies are of clinical importance since they may cause decreased red blood cell survival as the result of hemolytic transfusion reactions, hemolytic disease of the newborn or autoimmune hemolytic anemia. In vitro antibody screening tests are employed to reveal the presence of these antibodies in patient and donor sera. If the test is positive, further evaluation is required.

Note : Abnormal Results are Highlighted.

Biopsy- CNS (SOL)		
BIOPSY NO	H/5416/24	
PROCEDURE	Right FP craniotomy and excision of lesion	
SPECIMEN	Sp.1) Lesion Sp.2) Involving dura by the lesion	
CLINICAL DETAILS	C/O headache, left side weakness from 15-20 days Right FP dural based contrast enhancing lesion	
GROSS EXAMINATION	Sp.1) Received multiple soft tissue bits together measuring 6.0 x 3.0 x 1.5 cm. Representative sections taken (5) blocks. A to F - Random Sp.2) Received single dura tissue with attached soft tissue measuring 2.0 x 1.0 x 0.5 cm. All taken in (1) block. (Grossed by - Dr. Manan shah)	
MICROSCOPIC EXAMINATION	Sections reveal a meningotheial neoplasm to be composed of diffuse proliferation of epithelial and syncytial cells with ill-defined cell boundaries separated by a large number of variably sized thin and thick-walled vascular spaces. Some of these vessels have hyalinized wall. Foci of benign adipose tissue are also present. Mitoses and necrosis are not seen.	
IMMUNOHISTOCHEMISTRY STUDY	Tumor cells are positive for EMA and PR. H3K27Me3 nuclear expression is retained. CD34 highlights numerous vessels.	
IMPRESSION	Meningioma, CNS WHO Grade 1.
